Job Fair

I would like to thank all of the parents that helped make the USJ Job Fair a successful event! These wonderful experiences for children cannot be made possible without the help and support of the parents. I would like to give a special thank you to **Ms.Onofre** who worked to coordinate the interviewers and refreshments!

Eco-System Invention

Our next invention which is due at the end of the quarter is a plant hugger invention. Students will create a device that is either helpful to or decorative to a specific ecosystem of their choosing. Looking into current event issues can help spur on ideas of current needs for ecological help.

Science

Last week we completed adding animals to our aquariums and also created isopod igloos to capture rolie pollies for our terrariums. The children will continue to make observations this week. It is my hope to add a small cricket and isopod this week. We will opt to watch videos on the different forms of pollution rather than pollute the Eco-chambers. I plan on sending home the ecochambers by the end of the week so we can concentrate on other pressing material.

1.01 Describe and compare several common ecosystems (communities of organisms and their interaction with the environment).

USJ Shirts Have Arrived!!!

We will be wearing these shirts every Friday. I will hand them out tomorrow. I plan on taking a class picture this Friday for the website. The shirts turned out very nice.

Math

We will be working with rounding decimal numbers this week using number lines and benchmarks. Some children are still struggling with place value. They must be able to name and identify place value from the billions to the hundred thousandths place. The biggest issue I see is that children do not know basic place value and when you make it more complex that just compounds the problem. [I have added a video to help reteach or help parents understand what we are doing in math on the homework page on the website under Monday.](#)

Up Coming Event

- ❖ September 15th – Biography Book Report
- ❖ September 21st - Ecosystem Invention Due
- ❖ September 22nd – Harris Teeter Trip- Math
- ❖ September 28th – Read-A-Thon
- ❖ September 29th - Early Release - Track Out Day

**Please note that I update this list weekly. There are many tests not listed yet, because I am not exactly sure where they will fall until we get closer to the date.*

Track Out Camp

I am looking for a place for the critters to go to Camp over Track Out. If anyone can provide a place for the bird, hedgehog, bearded dragon & crested Gecko please let me know. Many children have made requests, but I take parent notes, 1st come first choice of who can come to your camp!

Behavior

I would like to thank everyone for talking to their children about behavior. I ask that you please continue to reinforce appropriate behavior daily. Last week was much better. I will send out invites on DOJO to the children invited to the Pizza Lunch. This week the number required to go will be **224 or greater**. After this week it should be easier. My phone is having difficulty with charging so it may take me a bit of time to get it all updated. I also left that clipboard at school so it will be tomorrow before I have a chance to get Thurs completed and Friday recorded.

BUSY WEEK!!!!
