Ecosystem Project

There were many impressive Ecosystem projects presented last week. Some of these are great ideas are possible signs of our future from this next generation of scientists and government policy makers!

Student Led Goal Setting Conferences

On This **Thursday, September 28th**, we will have our student led conferences in the **media center from 7:30-9:20**. Each child will share what they have been working on as well as goals they have set. You will review and help modify goals as needed. This is a very valuable conference for you and your child to take ownership of what they are doing and where they are going. For students at Sound of Sea I will set up another date for your conferences.

Science

Last week we spent a great deal analyzing food webs and how changing one area of a food web can affect the entire food web. We also discussed the impact that man and the industrial revolution has had on our World. We will be taking the end of Unit Science test on Tuesday. I gave students a study sheet last week and I will attach one to the newsletter as well.

Math

This week we will work on adding and subtracting decimals with problem solving as well as assessing these skills using models such as base 10 grids and number lines. **I have added 3 videos to help reteach or help parents understand what we are doing in math on the homework page on the website under Monday.**

DC Payments-

The 1st payment is Due between September 1st and October 23rd. This payment of at least \$80 per person – child and chaperones holds a spot on the bus and allows us to make proper reservations for bus and hotel rooms. These reservations require deposits up front and these initial payments cover the deposits. Personal checks, money orders, cash or if you wish to use credit you can use the online payment option on the DRES website. Warning there is a processing fee to the bank for the online payments.

Harris Teeter Trip

The trip to Harris Teeter was very successful. The children were engaged in math activities until lunch and asked to stay longer to complete more activities after lunch. I have lots of ideas for future trips. Tons of math learning took place! I would like to thank the parents who volunteered to walk with us on the trip. The experience would not have been half as successful without you.

Up Coming Event

- ❖ September 26th – Ecosystems Science Test
- ❖ September 28th – Student Led Conferences
7:30- 9:20 Media Center
- ❖ September 28th – Dojo Lunch
- ❖ September 29th - Early Release - Track Out Day

**Please note that I update this list weekly. There are many tests not listed yet, because I am not exactly sure where they will fall until we get closer to the date.*
